

PHODSATHON WIPHAHAS

KASETSART UNIVERSITY | INFORMATION TECHNOLOGY

Address: Rangsit , Pathum Thani, 12120

Phone: 0837251241

Email: wiphahasnp@gmail.com

PROFILE SUMMARY

An Information Technology student with a strong foundation in software development, system analysis, and emerging technologies. Highly motivated to apply theoretical knowledge to real-world challenges through an IT internship in a professional environment. Experienced in designing and developing diverse projects, ranging from web and mobile applications and IoT automation systems to AI model training. Strong analytical and problem-solving abilities, with a collaborative mindset and a willingness to adapt to rapidly evolving technical environments.

EDUCATION

Kasetsart University	Kamphaeng Saen , Nakhon Pathom
Bachelor of Science in Information Technology, Faculty of Liberal Arts and Science	
GPA : 2.98	4th Year Student (2023 – present)
Surawittayakarn School	Mueang District, Surin
Mathematics-Arts Program	(2017-2022)
GPA : 3.55	

PROJECTS

AI-Based Tomato Leaf Disease Detection System

- Analyzed disease symptoms and built a 1,000+ image dataset using Roboflow for data preparation
- Trained a YOLOv11 object detection model in Python, achieving up to 96% classification accuracy
- Evaluated system feasibility, identifying key strengths and limitations for real-world agricultural use

Smart Kitchen Hazard Detection System (IoT)

- Built an IoT system using ESP32 and gas/temperature sensors to detect smoke, gas leaks, and heat in real time
- Set up automated alerts (LED, buzzer, fan) and a live dashboard via Firebase and NETPIE

Information Systems Analysis & Design Project

- Conducted requirement gathering (interviews, open/closed-ended questions) and wrote system proposals for two systems: a Schedule Reminder System and an Online Sales System
- Performed logical design using HTA, Context Diagrams, DFDs, ER-Diagrams, and Decision Trees/Tables to map business processes and data flow
- Built physical design deliverables including database normalization, Data Dictionary, and UML diagrams (Use Case, Class, Activity, Sequence)

ADDITIONAL

- Language: Thai (Native), English (Basic)
- Technical Skills: Python, HTML5, CSS, JavaScript, Dart, SQL, PostgreSQL
- Tools: VS Code, Draw.io, Figma, Canva, Microsoft Office, AI Tools, Excel, Prisma
- Soft Skills: Communication, Creative Thinking, Analytical & Problem Solving, Teamwork

Internship Period: November 23, 2026 – March 22, 2027 (4 months)
